Index of key words

AEM, 165
ALCHEMI, 147
Alignment, 187
Aminoplast, 1
Analytical cytology, 11
Area of erythrocytes, 63
Array processor, 325
Atom location by channelling enhanced microanalysis, 147
Atom probe, 215
Avian eggshell, 23, 111
Axial, 215

Beam alignment, 127
Beam divergence, 93
Beam-sensitive materials, 225
Biological electron microscopy, 225
Boersch effect, 309
Boron, 165
Boron carbide, 345
Boundaries, 361
Brightness, 309
Brittle materials, 295
BSE imaging, 111

Cell colony, 119
Cell shrinkage, 63
Cell sorting, 11
Centriole, 1
Chromium oxide, 137
CO_2, 233
Coincidence techniques, 155
Collagen, 1
Computer controlled scanning microdensitometry, 85
Conduction planes, 203
Contrast transfer function, 225
Convergence effects, 177
CTF, 127
Cultivated microorganisms, 79

Defocus spread, 93
Diffusion profiles, RP3
Digital filtering, 325
Dislocations, 361
DNA ploidy, 11
Dry mass determination, 85
Dysplasia, 99

EDS, RP3
EDX, 165
EELS, 177
Electron microscopy, 23, 73, 79, 119, 339
Electron microscopy methods, 115
Electron optics, RP3
Electron trajectories, 155
Embryos, 123
Energy dispersive system, 325
Enhanced contrast, 123
Enhanced X-ray emission, 147
Envelope functions, 93
Erosion, 331

Fatigue, 279
Fe–Ni–Cr alloys, 233
FET, 165
Fibre optics, 123
Field emission, 309
Flat embedding, 79
Flow cytometry, 11
Flow scan device, 325
Focusing, 187
Fractography, 37
Frame store, 339
Freeze fracture, 123

Haematite, 137
High resolution TEM, 93
High temperature oxidation, 263
High-voltage HREM, 127
Hot-hardness, 345
HREM, 137, 187, 203, 249

IBAS image analyser, 53
Illuminating angle, 93
Image analysis, 11
Image digitizing, 339
Image processing, 225
Image simulations, 203
Imaging techniques, 263
Indentation analysis, 295
Indentation fracture, 345
Indentation plasticity, 345
In situ experiments, 263
Internal oxidation, 233

Kiwi, 23, 111

Ladder and labyrinth dislocation structures, 279
Lattice fringes, 127, 215
Lens aberrations, RP3
Light microscopy, 73, 79
Line profile, 85
Liquid impact, 331
Localized surface, 37
Low-dose imaging, 225
Lung alveolar stereological parameters, 53

Magnesium oxide, 137
Magnetic recording head, RP1
Mass calibration, 85
Melamine, 1
Membranes, 1
Metaplasia, 99
Microdissection, 123
Microanalysis, 155, 377, RP3
Microscopy, 339
Microstructural control of fracture paths, 345
Monte Carlo, 155
Multiple elastic and inelastic scattering, 177
Multiply-twinned particles, 249
Muscle, 73

Nasal epithelium, 99
Nearest-neighbours, 107
Neoplasm, 119
Noise, 165

Persistent slip bands, 279
Phase contrast transfer function, 93
Phase separation, 325
Photoreceptor, 1
Polymyosites, 73
Polystyrene latex spheres, 85
Pore geometry, 23, 111
Preservation of erythrocyte shape, 63
Profile analysis, 37
Protective oxidation, 233

Quantitation image analysis, 325
Quantitative microscopy, 37

Radiation damage, 225
Reflexive nearest-neighbours, 107
Resolution, 127
Roughness index, 37

Scanning electron microscope, 325, RP1
Scanning electron microscopy, 63
Scarce microorganisms, 79
Selection, 79
Si(Li), 165
Silicon, 345
Silicon carbide, 345
Silicon nitride, 345
Sodium β-alumina, 203
Spatial distribution, 107
Specimen preparation, 263
Staining, 115
STEM, 155, 249, 377
Stereo pairs, 63
Stereology, 99
Stereomicroscopy, 123
Stigmating, 187
Striated muscle, 1
Strength, 295
Structure imaging, 203
Superionic conductors, 203
Surface modelling, 37

TEM, 215, 237
Test of randomness, 107
Thick sections, 115
Thin sections, 115
Topography, 37
Transfer loop, 115
Transmission electron microscopy, 85, 123, 263
Triple junctions, 107
Tungsten emitters, 309
TV imaging, 339
Twin defects, 137

Ultrastructure, 23, 111, 119
Ultrastructure of ghosts, 63

Volume of erythrocytes, 63

Water-embedding, 1
Weak-beam microscopy, 361
Wear, 331
Windowless, 165

X-rays, 155, 165
X-ray absorption, 147
Xenopus, 123
